EDUCATION

Sagi Rama Krishnam Raju Engineering College

B.Tech – Computer Science and Information Technology — GPA: 8.30

May 2027

Bhimavaram, India

- **Coursework:** Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, OOPs

INTERNSHIP

Software Development Intern — Bluconn AI India Pvt. Ltd.

Jan 2026 – Present — Remote

- Developed workflow management features in the Bluconn admin portal to manually create and configure AI agent workflows and tool definitions.
- Built interfaces and backend integrations for defining agent execution logic, tool schemas, and workflow orchestration pipelines.
- Implemented Claude-based AI agents to automatically generate tool definitions from natural language prompts; evaluated accuracy and structured output quality of AI-generated configurations.
- Collaborated with the engineering team to improve workflow automation, prompt handling, and agent-driven execution systems.

Website Developer & FTP Management Coordinator — SRKREC College Website

Apr 2025 – Present —

Bhimavaram, India

- Developed and maintained dynamic web pages, event portals, and administrative interfaces for the official college website.
- Managed FTP-based deployments, website updates, file transfers, and production releases across multiple hosting environments.

PROJECTS

JAITRA 2026 – Inter-College Sports Carnival Platform

[View](#)

PHP, MySQL, JavaScript

- Built a full-stack event management platform for a 3-day inter-college sports carnival, handling multi-sport registrations, team scheduling, and bracket management across concurrent events.
- Designed and architected the entire MySQL database schema from scratch, modeling teams, matches, scores, sports categories, and scheduling relationships for real-time data integrity.
- Developed end-to-end live scorecards with real-time score update functionality, enabling instant match result reflection across leaderboards and standings without page refresh.
- Built responsive admin dashboards for event coordinators to manage live score inputs, match progressions, and scheduling updates during the carnival.

REVA-AI – Agentic Voice Complaint Registration Portal

[GitHub](#)

Node.js, Express.js, React, Vite, PostgreSQL, Prisma ORM, Azure OpenAI, Azure Speech, Docker

- Built a full-stack agentic complaint portal enabling citizens to file complaints via multilingual voice interactions across 11 languages (Hindi, Telugu, Tamil, and more) using Azure Speech-to-Text.
- Engineered a 7-stage AI agent pipeline (safety check → narrative collection → structured extraction → missing data loop → threat detection → FIR-style summary → user confirmation) powered by Azure OpenAI.
- Implemented geofencing-based complaint routing to the nearest police station with an automated escalation system for unresponsive stations; built role-based access control (RBAC) for Super Admin, Station Admin, and Officer roles.
- Designed JWT auth with access/refresh token rotation, reuse detection, HTTP-only cookies, rate limiting, and Aadhaar masking; containerized the full stack using Docker Compose with PostgreSQL and Prisma ORM.

SKILLS

Languages: Java, Python, JavaScript, TypeScript, PHP, C

Frameworks/Libraries: React.js, Next.js, Node.js, Express.js, NestJS, Tailwind CSS

Databases: MongoDB, MySQL, PostgreSQL

Tools/Technologies: Git, GitHub, Docker, Postman, Vercel, Supabase, Prisma ORM, AWS S3, Android Studio

AWARDS & ACHIEVEMENTS

Best Implementation Award – UDBHAV Hackathon (Team Lead) — **2nd Place** – Smart India Hackathon (Internal)

Participated in multiple national-level hackathons and collaborative software development events.
